	Blogger.com is Google's free tool for creating blogs		
Blogger	 The blog function allows you to post current information on the website as a "post" - that 		
	post is simultaneously emailed to your subscribers		
	Easy set-up and maintenance that does not require someone that knows "html" or "code"		
	 You can use your own custom domain name 		
	ClassDojo.com is a free online behavior management tool		
	Works well with beginner classes		
	Access using the website or iPad app		
	 Students earn and lose points for customizable behaviors – you can create buttons for 		
	anything from "outstanding performance" to "insufficient practice time"		
	• Project the website or app on a screen or the wall so students can see how they are doing		
	Weekly report automatically emailed to parents every Friday!		
flickr	Flickr.com is a free online photo management and sharing application		
	Easily create a slideshow to put on your website		
	Store 1 terabyte of pictures for free		
	• Google Forms lets you create a question/answer form to help send a survey, give		
	students a quiz, or collect information in an easy, streamlined way		
E Forms	Responses to the form are automatically recorded to a Google spreadsheet		
	• Embed your form in a post on your website or send it to students as an assignment in
